1-800-JETTING

US Jetting 4018 – 600 Gallon, Truck Mounted High Pressure Jetting Unit & Trailer Toter

This ***US Jetting 4018*** – 600 Gallon truck was built to the design of a CIPP lining contractor. It was designed to transport a 22' long enclosed liner trailer. High pressure jetting unit and a work crew to a jobsite with a single vehicle.

The ***US Jetting 4018 Run Dry Pump*** provides 4,000 PSI at 18 Gallons Per Minute for the maximum pipe cleaning effectiveness, a critical component of any cured-in-place pipe lining project.

Hydraulic power pull-out reel can be extended and swiveled for curbside use on pipe lining jobs without disconnecting the trailer. When not used for lining work, this **US Jetting 4018** is used for typical sewer and drain line cleaning tasks.
